## Fantasea Catalog

Fall

# Welcome

## to Fantasea Line

2  
/ page

**Fantasea Line is proud to present its Fall 2008 product catalog.**

**Fantasea Line** ([www.fantasea.com](http://www.fantasea.com)) is an international company that has been involved in the diving, water sports and photographic industries for close to 40 years.

**Fantasea Line** is dedicated to developing, manufacturing and marketing creative and affordable products with a special focus on water-sports, diving and underwater photography equipment.

Besides manufacturing its own products, **Fantasea Line** cooperates with leading international manufacturers in joint projects helping to design, test and market their products. You can see some of these "joint venture" products in the following pages.

**Fantasea** Fantasea is the Marketing & Product Development Section of H.R. Fantasea Photo and Marketing Ltd.

**We hope you enjoy our products and we plan to bring you many more new and exciting products in the years to come.**

**Howard and Nadav**  
H.R. Fantasea Photo and Marketing Ltd.

# Why Fantasea?

3  
/ page

**Fantasea's** experience with underwater photo products and accessories enables the design and manufacturing of camera housings at low cost and in a relatively short period of time.

**Fantasea** offers sturdy, efficient and reliable products at a price considered to be the most affordable in the market.

**Fantasea's** accessories systems are designed to be compatible with almost all housings in the market, including Canon, Olympus, Fuji, Kodak, Panasonic, Casio, Sony and more.

**Fantasea's** camera housings are the only ones in the market that come with warranty and flood insurance, included in the price.

- One-year free D.E.P.P flood insurance policy
- One year warranty for defective parts (two if purchased in Europe)
- Removes distributor or dealer liability with respect to camera loss due to flooding\*

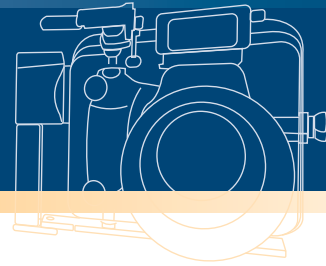

**Fantasea** products are distributed throughout the world.

- Over 600 authorized dealers worldwide
- An international logistics center in Hong Kong for easy distribution to the world market
- Distribution center in North America for faster shipping and service to the Americas
- Distribution center for Europe scheduled to be opened in 2009

**\*According to terms and conditions of warranty and insurance policy**

# Camera Housings

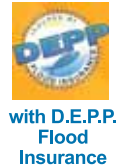

**5**  
/ page

**Fantasea has created a greatly improved digital compact housing design, featuring:**

- Access to all essential function controls
- Stronger construction
- Double radial O-ring seal on all control buttons
- The main seal is a durable compression type O-ring
- Sturdy chrome plated brass construction on all controls
- New, removable flash diffuser design
- LCD screen glare protection
- Stainless steel buckles
- 46mm threaded lens port ring, especially designed to accept a range of accessory lenses and filters
- Depth rated to 60m/200 feet

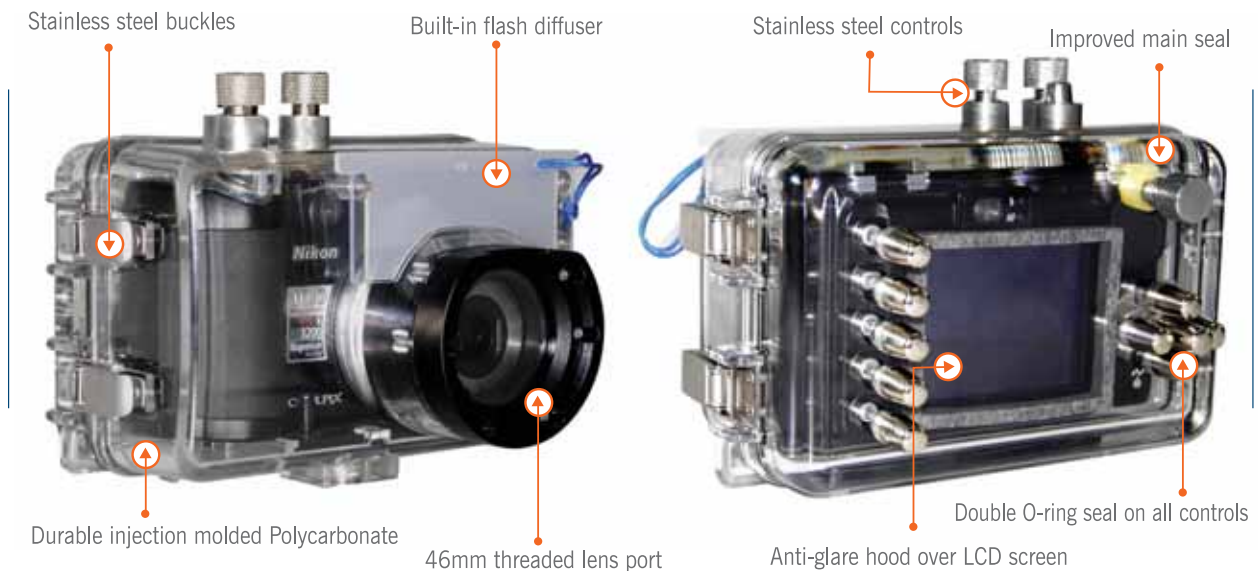

These improved housings are compact, lightweight and made of durable, non-corrosive polycarbonate plastic.

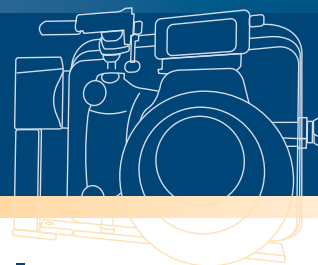

**Fantasea Housings include a one-year free D.E.P.P. flood insurance policy.**

**A complete specially designed accessory system is also available, including:**

- Wide Angle Lenses
- Red Filters
- Trays
- Flex Arms
- Ball & Joint Arm Sets
- Slave Flashes
- Focus Lights
- Fiber Optic Cables
- Protective Bags
- And much more...

# Housings for Nikon Coolpix Cameras

## Coolpix P series

**FP-6000 Housing** (Cat. No. 1119) **New Release!**

*New Generation*

For Nikon Coolpix P6000 camera

**FP-5000 Housing** (Cat. No. 1117)

*New Generation*

For Nikon Coolpix P5000 and P5100 cameras

**FP-1 Housing** (Cat. No. 1110)

*Previous Generation\**

For Nikon Coolpix P1 and P2 cameras

## Coolpix S series

**FS-710 Housing** (Cat. No. 1171) **New Release!**

*New Generation*

For Nikon Coolpix S710 camera

**FS-610 Housing** (Cat. No. 1161) **New Release!**

*New Generation*

For Nikon Coolpix S610 camera

**FS-600 Housing** (Cat. No. 1160) **New Release!**

*New Generation*

For Nikon Coolpix S600 camera

**FS-500 Housing** (Cat. No. 1209)

*New Generation*

For Nikon Coolpix S500 and S510 cameras

**FS-210 Housing** (Cat. No. 1207) **New Release!**

*New Generation*

For Nikon Coolpix S210 camera

**FS-200 Housing** (Cat. No. 1208)

*New Generation*

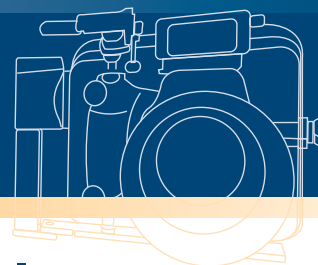

For Nikon Coolpix S200 camera

**FS-51 Housing** (Cat. No. 1251)

*New Generation*

For Nikon Coolpix S50, S50c, S51, S51c, S52 and S52c cameras

\* Previous Generation Housings provide access only to essential control buttons and are depth rated to 40m/130 feet.

## Coolpix CP series

**CP-6 Housing** (Cat. No. 1060)  
*Previous Generation\**  
For Nikon Coolpix 4600 and 5600 cameras

**CP-4 Sport Housing** (Cat. No. 1030)  
*Previous Generation\**  
For Nikon Coolpix 4300 and 885 cameras

**CP-3N Housing** (Cat. No. 1020)  
*Previous Generation\**  
For Nikon Coolpix 2200, 3200, 4100 and 5100 cameras

**CP-3 Housing** (Cat. No. 1010)  
*Previous Generation\**  
For Nikon Coolpix 3100 and 2100 cameras

## Housings for Canon PowerShot Cameras

**FSD-770 Housing** (Cat. No. 1385) **New Release!**  
*New Generation*  
For Canon PowerShot SD1100 IS / IXUS 80 IS and SD770 IS / IXUS 85 IS cameras

\* Previous Generation Housings provide access only to essential control buttons and are depth rated to 40m/130 feet.

# Typical Compact Digital Housing Accessory System

**10**  
/ page

# Optics: Lenses, Filters & Adaptors

**11**  
/ page

Fantasea optic products are designed to enhance and improve your underwater images with respect to sharpness, focus range, colors and overall image quality.

Fantasea Line offers a selection of 'wet' accessory lenses that fit onto the housing's lens port and can be installed and removed during the course of the dive. These accessory lenses are mounted on the housing lens port and held in place by a 46mm aluminum threaded screw.

Fantasea accessory lenses and red filters are compatible with Fantasea and other brands of compact digital housings.

- Additional Adaptor (#4095) required for the CP-5 and CP-7 Housings
- Additional Adaptor (#4096) required for the CP-3, CP-3N, CP-4, CP-6, FL-3, FL-4, FL-6, FP-1 and FP-4 Housings
- Additional Adaptor (#4089) required for the FS-5, FS-6, FS-9 and FS-51 Housings
- Can be mounted **directly** on top of all other Fantasea compact digital housings lens ports
- Almost all Olympus Housings
- Other housings with a 46mm, 52mm or 55mm threaded lens port

## Lenses

### **FWAL-01 Wide Angle Lens** (Cat. No. 5121)

Perfect for photographing seascapes, divers, shipwrecks and schools of fish, without moving further away from the subject, thereby still taking full advantage of water clarity and artificial light sources.

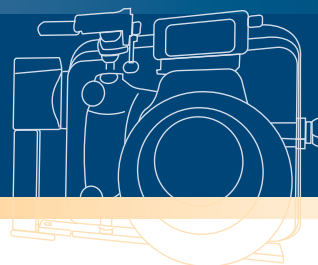

- Lens construction: 4 groups – 4 elements
- Lens magnification: x0.54
- Focal length: 20mm
- Depth rated to 50m/180 feet

### **FML-01 Macro Lens** (Cat. No. 5127)

Perfect for shooting close-up images of fish, corals, textures and more. The macro lens magnifies the subject and enables the camera to focus on short distances for creating super sharp images.

- Lens construction: single aspherical element
- Focal length: 333mm
- Depth rated to 60m/200 feet

# Optics: Lenses, Filters & Adaptors

**12**  
/ page

## Red Filter

### Red Filter 46 (Cat. No. 5178)

The Red Filter is used to restore the red color absorbed by the water. In shallow depths, these filters can serve as an attractive alternative to artificial light sources.

## Lens & Filter Adaptors

Lens and Filter Adaptors enable the use of accessory lenses and filters with a different diameter than the housing's lens port diameter. They may be mounted on Fantasea compact digital housings lens ports, as well as other major housing brands.

| Cat no. | Product name                            | Enables the use of the FWAL-01 Wide Angle Lens, FML-01 Macro Lens and Red Filter 46 with- |
|---------|---|---|
| 4089    | Wide Angle Lens Adapter 41 to 46        | FS-5, FS-6, FS-9 and FS-51 Housings   |
| 4095    | Wide Angle Lens Adapter 48 to 46        | CP-5 and CP-7 Housings  |
| 4656    | Wide Angle Lens Adapter 56 and 55 to 46 | CP-3, CP-3N, CP-4 Sport, CP-4 Pro, CP-6, FL-3, FL-4, FL-6, FP-1 and FP-4 Housings.        |

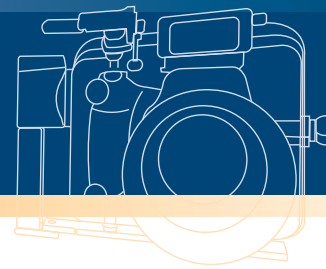

## Lens & Filter Holder

The Lens and Filter Holder attaches to Flex and B&J Arms and allows for secure attachment of accessory lenses and filters when they are not in use.

### Lens Holder 46 (Cat. No. 4051)

- Includes a T2 Connector
- 46mm thread
- Compatible with the FWAL-01 Wide Angle Lens, FML-01 Macro Lens and Red Filter 46
- For all Fantasea compact digital housings (additional adaptor may be required, please see Lenses and Red Filters)

# Lighting Systems

**13**  
/ page

## Flashes / Strobes

External flashes are required in order to improve the color in underwater photographs. They can be used to supplement the ambient light source in order to create improved lighting conditions, even approaching those on land, and for deeper dives they are essential to produce photos in which the colors are more vivid than they would be without the external lighting. Without a good external flash it is impossible to photograph with a wide angle lens. By using only the camera's internal flash, the image will be marred by a significant shadow created by the wider body of the wide angle lens. Night dive photo images are also seriously enhanced when using an external flash.

Slave strobes are popular flash units to be used with compact digital housings. These slave units trigger in sync with the digital camera's internal flash and synchronize by a small slave sensor built in the strobe body.

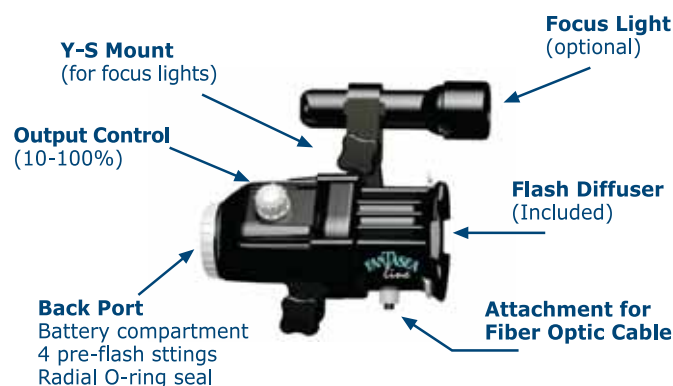

Fantasea Line offers a selection of excellent underwater flashes, specially designed for compact digital housings. These flashes feature several pre-flash settings to serve the need of all compact digital cameras in the market, and therefore are compatible with almost any housing, including Fantasea, Canon, Olympus, Fuji, Sea & Sea, Sony, Kodak, Casio and more.

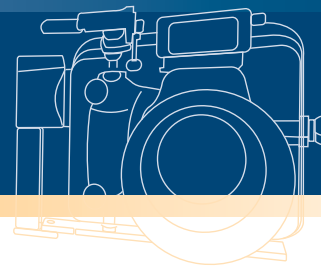

### 4x4 Flash (Cat. No. 6117)

**New!** Features a guide number of 20, suitable for both macro and wide angle photography. Includes a Y-S mount for attaching a focus light on top of the flash, thereby sparing the need for an additional arm.

- Guide number 20
- Adjustable output level (10-100%)
- Uses 4 x AA batteries
- 4 pre-flash modes
- Includes Y-S mount for Focus Light
- Depth rated to 55m/180 feet

**Fiber Optic Cable and Focus Light are not included with flash. They can be ordered separately.**

# Lighting Systems

**14**  
/ page

## **Nano Flash** (Cat. No. 6115)

An ultra compact digital slave strobe and underwater protective housing kit. Perfect for all compact digital cameras, including those with the pre-flash function.

- Guide number 12
- Uses 2 x AAA batteries
- 3 pre-flash settings
- Adjustable output level (1-3)
- Fiber Optic Cable can be ordered separately
- Depth rated to 40m/130 feet

## Flash Connectors

Although most slave strobes feature a slave sensor and are capable of synchronizing with a compact digital camera's internal flash without using any cables, a fiber optic cable ensures the best synchronization between the external strobe and the camera's internal flash in all angles and all light conditions.

The fiber optic cable attaches to the strobe's slave sensor on one end and to the outside of the camera housing on the other end.

## **Nano Fiber Optic Cable Kit** (Cat. No. 6315)

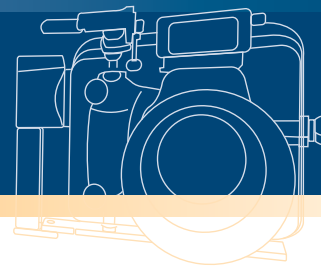

Specially designed for the Nano Flash, 4x4 Flash and Sea & Sea Strobes.

## **Nano Adaptor** (Cat. No. 61151)

Used to attach the Nano Fiber Optic Cable Kit (#6315) directly in front of the slave sensor on the Nano Flash, 4x4 Flash and Sea & Sea strobes.

# Lighting Systems

**15**  
/ page

Fantasea Line manufactures and distributes a wide range of LED Lights perfect for all marine and outdoor use. Fantasea's LED Lights are specially designed for diving activities including night, wreck and cave diving. These lights are ideal for use as modeling or focus lights.

## **LED 44 Light with Emergency Flasher** (Cat. No. 6095)

Perfect for all outdoor use. An excellent modeling, night dive and focus light with a built-in emergency flash strobe system. Visible up to 5 km/3 miles at night.

- Made of plastic (polycarbonate)
- 44 LED diodes giving 4.5 watt power at 6166 Kelvin
- Uses 5 x AA batteries
- Burns up to 8 hours per set of batteries
- Features illuminations of 220 lux
- 25 Lumen/sq. cms.
- Waterproofing Seal Gasket and Switch O-Ring
- Dimensions: Approximately 80(W) x 70(H) x 155(D) mm
- Weight: Approximately 180g (without batteries)
- Color: Clear
- Includes mounting ring and stainless steel wing nut for easy attachment to strobe arm and lens port bracket
- Includes hand lanyard
- Depth rated to 40m/130 feet

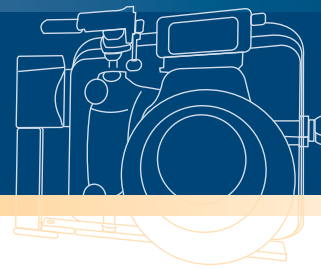

## **Nano Torch** (Cat. No. 6021)

High intensity ultra compact LED light, ideal for night dives.

- Uses 1 W Super Bright LED
- Bulb life: about 10,000 hours
- Intensity: 20-30 lumens
- Light color: 6,500K
- Uses 4 x AAA batteries
- Burns up to 6 hours per set of batteries
- Weight: 54g (0.12lb) without batteries
- Dimensions: 36mm/1.4 inch diameter and 133mm/5.2 inch long
- Color: Blue
- Depth rated to 100m/330 feet

# Lighting Systems

**16**  
/ page

## **Nano Focus Light** (Cat. No. 6022)

High intensity ultra compact LED light, specially designed as a modeling light and to better enable the camera's auto focus. Features a wide even beam and automatic light shut off when camera pre-flash is fired.

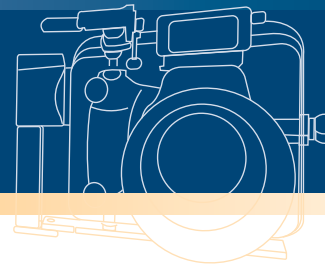

- Uses 8 x 5 Super Bright LED bulbs
- Luminance: about 18,000 mcd
- Bulb life: about 10,000 hours
- Light color: 7500K
- Uses 4 x AAA batteries
- Burns up to 8 hours per set of batteries
- Weight: 60g without batteries
- Dimensions: 36mm/1.4 inch diameter and 133mm/5.2 inch long
- Includes an Accessory Light holder with Y-S mount
- Color: Black
- Depth rated to 100m/330 feet

## **Nano Spotter** (Cat. No. 6023)

A new LED application, similar to the old "Chemical Stick Lights" but re-usable and environmentally friendly. Perfect to use as a back up diving torch, as well as a signal light for night dives. A plastic cone attaches to the light side end of the torch and emits a diffused light. Small, multi-colored plastic disks allow for various lighting options, perfect for diver identification and signaling underwater and on the surface.

- Uses 4 x AAA batteries
- Burns up to 60 hours per set of batteries
- Features 5 super bright LED bulbs
- Produces 500,000 mcd
- Color: Yellow
- Depth rated to 30m/100 feet

# Lighting Systems

**17**  
/ page

## **Nano LED Pro Set** (Cat. No. 6039)

A compact and powerful multi purpose LED light system. Uniquely designed to be used as a powerful diving torch, focus light for underwater photography and as a signaling light for above and below water, perfect for diver or vessel identification.

- Uses 4 x AAA batteries
- Burn time: 2-5 hours
- LED life time: Over 10,000 hours
- Luminous intensity: Over 180 lumen
- LED type: 3W High-power LED
- Color temperature: 5,000-10,000K
- Color of torch: Metallic coated finish
- Color of light: Clear, yellow, green, blue and red
- Size (mm): 36(W) x 36(D) x 132.5(H)
- Weight: 83 grams (not including batteries)
- Depth rated to 100m/330 feet

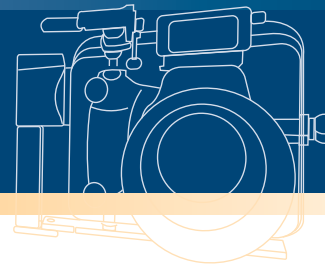

## **Nano LED Lights Point of Sale Display** (Cat. No. 60209)

The perfect way to sell our unique LED Lights, featuring an assortment of our compact Nano LED Lights for diving, water-sports, photography and navigation. Our Nano LED Lights POS Display is an economical way of purchasing Fantasea Nano Lights. Each display contains:

- 5 x Nano Torch (#6021)
- 5 x Nano Focus Light (#6022)
- 5 x Nano Spotter (#6023)
- 5 x Nano LED Pro (#6039)

# Trays, Arms & Connectors

**18**  
/ page

Fantasea offers a wide variety of trays, arms and connectors for a stable, comfortable, durable underwater camera system that well serves the underwater photographer's needs. The Fantasea system allows for different products, such as Ikelite, Canon, Olympus, Sea & Sea, Inon, Epoque and more, to be integrated into one system.

## Tray

### **XL Stay Slot Tray** (Cat. No. 2030)

A sturdy aluminum tray connects the entire underwater photo system, housing, arms, flash and lights. The tray comes with two T1 connectors for easy assembly of two arm systems. Compatible with both Fantasea Flex and B&J Arm Sets. Size: 30cm/12 inch.

## Flex and B&J Arms

### **Flex Arm 30** (Cat. No. 3040)

Flexible arm made of rugged Polycarbonate plastic material for attaching a flash or light to the tray. The arm comes with a standard T1 connector, attached directly to Fantasea trays and allows a light to be positioned at any angle. A lens holder can be ordered separately. Size: 30cm/12 inch.

### **Medium Ball & Joint Arm Set** (Cat. No. 3092)

Lightweight and made from rugged anodized aluminum, especially designed to support underwater lights and strobes. The B&J Arm Set comes with a flash head connector, as well as strong and dependable clamps. The arm can be attached to a Fantasea tray by using a B&J Base Connector 45 (#4035), which can be ordered separately. Total Length: 57cm/22.5 inch.

# Trays, Arms & Connectors

**19**  
/ page

## Arm Segments & Connectors

### **Ball Mount** (Cat. No. 3011)

Aluminium Ball & Joint Strobe Head Mount. Designed to fit Fantasea, Sea & Sea and Epoque Flash Heads. Can be adapted for Ikelite and Inon flash heads and others (See adaptors in this section).

### **B&J Clamp** (Cat. No. 3012)

Aluminium Ball & Joint Clamp for attaching two Ball & Joint arm segments.

### **Small Aluminum B&J Arm Segment** (Cat. No. 3016)

Lightweight and made from rugged anodized aluminum, this arm segment can serve as a component in a complete Ball & Joint Arm Set.

### **T1 Connector** (Cat. No. 4010)

Attaches various accessories to the Trays like Flex Arm, B & J Arms, Lens Holders etc. Made from Non-corrosive anodized aluminum.

### **T2 Connector** (Cat. No. 4020)

Attached to the Flex Arm or Ball & Joint Arm and serves as the base for the Lens Holder. Made from sturdy Non-corrosive anodized aluminum and Polycarbonate.

### **B&J Base Connector 45** (Cat. No. 4035)

Connects Ball & Joint Arm Sets to Fantasea trays at an angle of 45 degrees. Adaptable screw on connector. Ball Diameter: 26mm/1 inch.

# Housing System Sets

**20**  
/ page

Fantasea Housing System Sets were specially designed to offer the most useful, dependable and affordable solutions for the most popular underwater accessory products. They include different combinations of essential underwater photo products, such as cameras, housings, trays, arms, lights, flashes and more and any items in these sets can be upgraded to include additional accessories listed in the catalog or on the Fantasea website ([www.fantasea.com](http://www.fantasea.com)).

## Lighting Sets for Your Housing

Fantasea Lighting Systems were designed to be compatible with almost any housing in the market, including Canon, Olympus, Fuji, Sea & Sea, Sony, Panasonic, Casio and more.

The near 'universal' application of these accessory sets makes them an essential item for any dealer or shop offering underwater photo products and accessories.

The Lighting Systems were designed by our engineers and professional photography staff to offer the most useful, dependable and affordable solutions for underwater lighting, considered to be essential for enhancing underwater images.

Size, product quality and cost are our main concern when choosing the various components that make up the Fantasea Lighting Systems product line.
